

Subject: Proposed Changes to DHALO

Date

Dear Director Arway,

This letter is in response to the Fish Commission's proposed changes to the DHALO areas as published 22 January, 2015.

I am all for getting more youth involved in fishing, but not at the expense of denigrating the DHALO area program, which has been so successful. I'm concerned about the use of bait, not so much about the bait itself, but because of the containers it is sold in, which often end up on stream banks as litter. This is bad enough in public areas but could sound the death knell for access in the many waters flowing through private lands, in which our club and others have worked with landowners to achieve a somewhat tenuous access.

I have other objections to these changes which I will list in other correspondence.

Respectfully,
