

Subject: Proposed Changes to DHALO

Date

Dear Director Arway,

I am voicing my objection to the proposed changes to the DHALO areas proposed by the Fish Commission.

Allowing bait fishing at any time, by anyone is contrary to the intent of the rationale behind these special areas. To suggest that this is simplifying the administration of these areas is not correct.

Reducing the size limit of retained fish to seven inches encourages the taking of stream bred fish, which is something we should all be against.

This also creates more confusion; if fish are to be retained anywhere have one size.

These areas attract fishermen from all over Pennsylvania and many other states because of their uniquely managed characteristics and fishing opportunities. Let's not destroy the attractiveness of the areas with ill-conceived changes.

Thank you,
